

Cameron Fuller

Austin, TX // (845) 559-4994 // Camfuller.dev@gmail.com

Profile

A detail-oriented game designer with QA and production experience. I bring a player-first perspective, strong gameplay instincts, a creative mindset, and a knack for problem-solving. Skilled at cross-disciplinary communication, team coordination, and converting feedback into clear, actionable work.

Experience

Designer // Airship Syndicate // 2024 - Present

DUST: Origins: Designed and implemented levels from concept through completion, including scripted gameplay events, dialogue, and combat encounters in UE5. Iterated on gameplay scenarios and combat pacing through testing and feedback.

Unannounced ARPG: Designed and implemented levels from concept, including scripted events, combat encounters, and boss experiences in UE5.

Unannounced Open-World Survival: Developed level design prototypes exploring world structure, player navigation, and core gameplay concepts.

Producer // Airship Syndicate // 2023 - 2024

Wayfinder (2024): Led cross-disciplinary production across gameplay, characters, weapons, enemies, systems, VFX/audio, and live content, driving team alignment, accountability, and delivery of content releases. Spearheaded coordination for the Echoes overhaul.

Associate Producer // Airship Syndicate // 2021 - 2023

Wayfinder (2024): Coordinated development effort across gameplay systems, characters, weapons, enemies, levels, VFX, and audio content.

QA Tester // Airship Syndicate // 2020 - 2022

Wayfinder (2024): Sole tester in the early stages; established test plans and documentation across the project; provided feedback for combat mechanics, systems, enemy and level design.

Ruined King: A League of Legends Story (2021): Owned testing for multiple levels and puzzles.

Tested full level playthroughs, encounters, combat mechanics, and dialogue. Tracked bugs through JIRA and managed workflows.

Production Assistant // Rooster Teeth // 2019

Vicious Circle (2019): Supported production and QA by building test plan spreadsheets, coordinating playtest feedback and action, assisting with RTX IT setup and custom trailer production.

QA Tester // Rooster Teeth // 2019

Vicious Circle (2019): Owned testing for many multiplayer features; created test cases and documentation; created and tracked bugs in JIRA; coordinated with Systems and Level Design; analyzed gameplay balance.

Education

University of Central Florida - Full-stack JavaScript web development bootcamp

Skills

Design: Level Design, Encounter Design, Systems Design, Data-Driven Design, Gameplay Scripting, Combat Pacing

Production: Cross-Disciplinary Coordination, Meeting Facilitation, Task Tracking, Playtest Feedback, Bug Triage

Tools: Unreal Engine, Blueprints, Unity, Miro, Jira, Asana, Adobe Illustrator, Photoshop
